1-30-20

Dear Sir,

Regarding the reported Southington water matter + the regulation to divert water from our river + streams, the government/EPA should not restrict use of water for human needs to include home + business consumption.

Running water for people should not be disrupted in favor of some fish or wildlife in an eco-system. Human consumption, to include our children, should ~~have access~~ be our primary concern. Our children should have access to abundant water supply. Also, the added cost for water would put an undue strain on the poor, unemployed + seniors.

BUREAU OF WATER PROTECTION AND
OFFICE OF THE DIRECTOR
FEB 03 2020

EXHIBIT
184

Do not support any new stream flow regulations at the expense of the people, especially children + seniors.

John Montgomery
