Dear Mr. Stacey,

As a resident of Cromwell, I am a citizen who very much supports healthy rivers for our own health and for that of wildlife — fish, birds, animals, and plants. I am in favor of having regulations passed which will protect our rivers from going dry. Diverting water, as you know, is very dangerous in most cases to water flow. I have studied the proposed regulations. Except for Class 4 which must be deleted, I support them. Class 4 must be eliminated — I shutter to think of what could happen to the Mattabasset and the Quinnipiac. They need to be protected! Thank you for your consideration.

Sincerely,
Luella Landis
