## Flexible Solutions Scale to Meet Expanding IT Environments

**CyrusOne data centers are engineered to match space and power to evolving business requirements, quickly deliver IT deployments, and stay ahead of demand.**

Since 2001, CyrusOne has designed, built and operated certified, highly secure and reliable multitenant data centers for mission-critical IT environments. As a public company (NASDAQ:CONE) now in 31 locations worldwide, CyrusOne serves nearly 900 customers and offers more than 3 million square feet of total net rentable space.

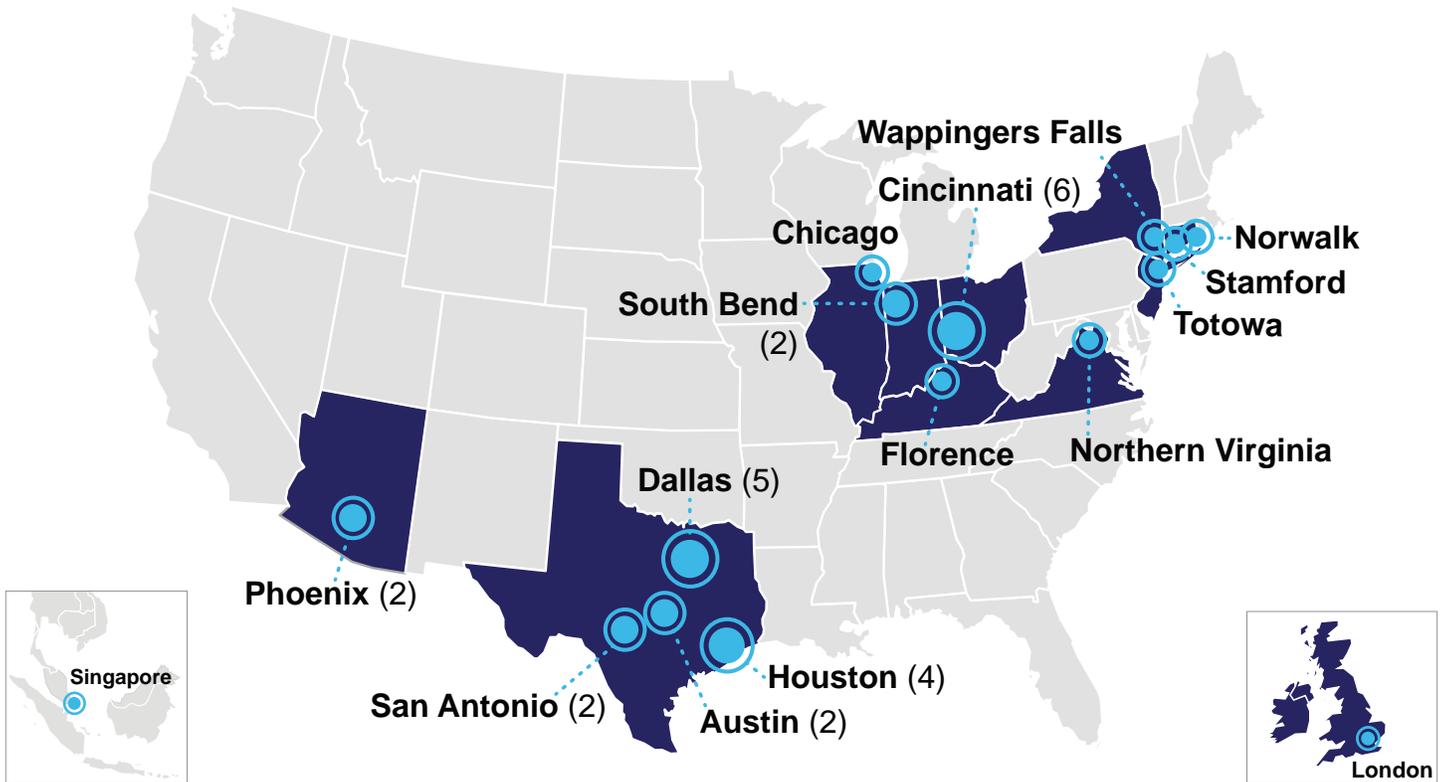

- Massively Modular<sup>®</sup> engineering efficiencies provide large-scale data center deployments and data-hall builds in as little as 12 weeks.
- A large portfolio of global locations in key markets provides large-scale production and disaster recovery platforms, along with Class A office space for workplace needs.
- CyrusOne meets the highest industry standards for certifications to ensure the safety, security and availability of all equipment and data, including SSAE16, TIA 942 Class 4, ISO 27001, HIPAA, PCI-DSS and FISMA.
- Power densities as high as 900 watts per square foot enable server environments to scale vertically to efficiently optimize the IT footprint with low, medium, high and ultra-high density solutions tailored to the rack level, matching specific application needs.
- CyrusOne Solutions<sup>™</sup> provide custom builds options through design and development of large, mission-critical IT deployments.

**Nearly half of the Fortune 20 and more than 160 of the Fortune 1000 trust CyrusOne.**

## Global Footprint, Geographic Flexibility

A large portfolio of 31 enterprise data centers provides reach and the flexibility to scale with expanding enterprise needs — across metro areas, markets and regions.

## Innovative Technology

Proven systems ensure reliability and cost savings through 2N redundancy, high-density footprints and robust low-cost connectivity over the CyrusOne National Internet Exchange (IX).

- Virtually eliminating downtime, 2N redundancy for mechanical and electrical systems provides a resilient environment with no single point of failure, along with industry-leading 100 percent uptime service-level agreements (SLAs)
- Advanced cooling technologies, high-density footprints and high-performance computing (HPC) capabilities enable customers to obtain server densities up to 900 watts per square foot to efficiently handle demanding IT environments.
- CyrusOne's National IX provides robust, low-cost connectivity between metro areas or regions, enabling mix-and-match platforms for production and disaster recovery.
- To match any application and server need, power redundancies tailored to the rack level include 2N, 1N or both for ultimate flexibility.
- With at least seven levels of physical protection, advanced security protocols eliminate the threat of unauthorized access.

## Exceptional Service from CyrusOne Experts

To ensure the highest-quality support, from design and build to management and reporting, an experienced team of CyrusOne professionals deliver customer-centric service directly.

- Consulting services match business needs with deployment speed and unique requirements for design, build, migration, ramp, security, power, connectivity, implementation, management and reporting.
- A 24/7 year-round Network Operations Center is on-call and accessible through a proprietary customer-service portal that enables always-on responsiveness.
- Complete transparency in communications, facility management and security avoids unwelcome surprises through prompt service-management alerts and reporting.
- Flexible contract design matches the IT environment to business objectives to allow for prompt deployments and ramp into power and space.
- Experienced CyrusOne implementation teams stand ready to address complex requirements, integrate processes, combine information handling and security.
- An extensive ecosystem of trusted partners with value-added solutions provides exceptional and readily available choices for complementary services.

## Committed to Standards and Compliance

CyrusOne designs its facilities to comply with rigorous standards set by trade groups and certifying organizations, while maintaining relevant certifications and attestations.

Discover why so many Fortune 1000 firms trust CyrusOne for their data center solutions.
