

**State of Connecticut  
Commission on Fire Prevention and Control**

**National Professional Qualifications Standards**

The State of Connecticut Commission on Fire Prevention and Control is pleased to offer Fire Service Certification to the members of Connecticut's fire service. Certification is an excellent means by which an individual may measure his/her knowledge, skills, and abilities against a national standard.

As indicated below, the Commission currently offers 40 levels of certification. The Commission has adopted the most current edition of the Standards for Certification based on the National Fire Protection Association professional qualifications.

The certification examination process for each level consists of practical skills and written examination. The levels of Firefighter I and Firefighter II also require verification of live fire suppression activities.

All of the Commission's Certification levels have been accredited by the ProBoard Fire Service Professional Qualifications Systems and the International Fire Service Accreditation Congress.
