A-3 FE exam specifications in 2014 (Dist. 4)

The Fundamentals of Engineering and the Fundamentals of Land Surveying exams will be going to computer based testing (CBT) in January of 2014. Since these exams will be offered more times per year and the procedures will change, these changes should reflect in

our statutes and regulations. The Board is requesting that attorney Steven Schwane look into what statutory changes need to be done in order for the Connecticut Board to be prepared for the new exam format.

AA-1 Request from Roy Merritt, Chairman of the Legislative Affairs Committee for the Connecticut Society of Civil Engineers (CSCE) to meet with the Board to discuss Connecticut licensing statutes for professional engineers; establish a 15 hour annual continuing education requirement, structural engineer license endorsement and to discuss the B.S. +30 hours of additional engineering education. Mr. Merritt is scheduled to appear before the Board at 9:30 am. (Dist. 2)

Roy Merritt, Chairman of the Legislative Affairs Committee for the Connecticut Society of Civil Engineers (CSCE), Robert Gomez, President of the Connecticut Society of Civil Engineers and Paul Brady, Executive Director of the American Council of Engineering Companies spoke before the Board in regards to statute changes. Mr. Merritt stated that CSCE, NSPE and ACEC-CT have formed a coalition to advocate improved engineering licensure laws in CT. The coalition is looking to establish a 15 hour annual continuing education requirement, structural engineer license endorsement and to eventually require BS degree +30 hours of additional engineering education to qualify to sit for the Professional Engineering exam.

The Board noted that there were statute changes that were submitted to the legislation that was not endorsed by the Board. The Board is willing to work with the coalition, but they must first work on adding that an accredited degree in engineering is required in order to qualify to sit for the engineering exam. The Board feels that there should be a progression of adding those changes, since there may be much opposition if all components are added at the same time.

The coalition will work with the Board and provide them with any legislative changes, with the understanding that an accredited degree in engineering is the first change to be implemented.

AA-2 Question from Jason Christopherson if an out of state professional engineer can stamp an EPA Spill Prevention, Control and Countermeasure (SPCC, 40 CFR Part 112) plan in Connecticut. (Dist. 2)

The Board's discussion revealed that if it requires a PE on a plan in CT then it should be sealed by Connecticut PE. If there is a federal regulation that supersedes state law, then the Board should be advised.

AA-3 Question from Thomas Pastor regarding the state regulations. (Dist. 2)

Mr. DeWolf will respond to Mr. Pastore.

AA-4 Response from applicant who was denied under class 10 (Dist.2)

The Board will work on having their policy regarding non-engineering degree noted on the website.
