### **Agenda**

#### **Old Business**

1. Prior minutes and the report on surrounding state laws were reviewed, minor corrections made and a motion was made and seconded to accept the minutes and report.

#### **New business**

1. The report on the surrounding state laws sparked discussion as to the continued utility of the Connecticut law on blending. Rhode Island has not program at this time while Massachusetts (in place but suspended) and New York City have biodiesel blending requirements, New York State has an incentive program. The discussion expressed concern that the law may never be fully enacted. A motion was made and seconded to draft a letter from the board to the Commissioners of DEEP and DCP on this issue.
2. A motion was made and seconded to adjourn.
