

Technology Workgroup #6

Minutes

April 5, 2006

2-4pm

Convener: Minakshi Tikoo

Major Topics/Discussion Points:

- Introductions
- Overview of guidelines for Comprehensive Mental Health Plan - Report Format
 - Every recommendation that we write must have a rationale and must include a description of how consumers, family members, and young people contributed to the recommendation
- Larger group broke into smaller working groups that focused on operationalizing how we can accomplish technology goals in each of several areas. Several groups presented their ideas and issues were discussed within the larger workgroup. Remaining groups will present their ideas at the next meeting on 4/19/06.
- We discussed ways to increase consumer/family participation in workgroup. In addition to inviting additional consumers/family members from respective agencies and fields, we discussed the notion of getting feedback from consumers/family members about information/recommendations generated by this workgroup through avenues such as focus groups and individual feedback sessions.

Next Meetings:

Wednesday, April 19, 2006 at CT Valley Hospital, Beers Hall – Mountain View Room from 2 – 4 pm.
