

STATE OF CONNECTICUT

DEPARTMENT OF PUBLIC HEALTH

OFFICE OF POLICY, PLANNING AND EVALUATION

Estimated Populations in Connecticut Towns As of July 1, 2000

Purpose:

The estimates in this series are provided to support research and planning activities which require town-level estimates. The mid-year population estimates for 2000 differ from other mid-year estimates issued by DPH since they require that population change be estimated only for the three month period following the April 1, 2000 Census, and they are based on a simpler estimation method (see *Methods* discussion below). Consequently these July 1, 2000 estimates differ only slightly from the April 1, 2000 Census figures.

Methods:

The April 1, 2000 Census count was used as the base population figure for each town. The change in population for the three months between April 1, and July 1, 2000 was estimated by calculating the natural increase (i.e. births minus deaths) during this period. The base population figure was added to the estimated population change for each town to calculate the July 1, 2000 population estimate. Birth and death counts were based on tabulations of provisional 2000 birth and death files. The April 1, 2000 Census population figures used in these estimates include the corrected Census counts (as of 11/15/2001) for the total population of Hartford and West Hartford*.

ESTIMATED POPULATION OF CONNECTICUT AS OF JULY 1, 2000

Estimated Population	Change in Population, 4-1-2000 to 7-1-2000	
	Number	Percent
3,409,549	3,984	0.12%
