

The U.S. Department of Energy has issued the following:

There has been an important update to the application submission process for direct EECBG formula grants. Late applications for direct formula funds will be accepted until August 10, 2009, 8:00:00 PM ET. Failure to meet this deadline will result in forfeiture of allocated funds. This extension will not delay the processing of those applications submitted by the initial deadline. Those applications that were submitted by the initial June 25, 2009, due date will be forwarded to the awarding agencies for review and award before those that were submitted after that date. Late applications will be processed as submitted. We strongly urge you to submit your application as quickly as possible. For more information please see <http://www.eecbg.energy.gov/>.
